

NZTC have been immersed in energy transition technologies since inception and hold a unique space within industry, academia and government.

We are a not-for-profit centre enabling and facilitating net zero technology programmes to support the energy transition

Energy Transition & Technology Programmes

Co-investing with industry to fund and develop technology projects and transition programmes. Co-ordinating and facilitating industry projects.

TechX Accelerator & Growth Programmes

An innovative programme for clean energy start-ups with potential to significantly accelerate the transition to an affordable net zero energy industry.

Net Zero Technology Services

Insights and foresights on emerging technology to inform and accelerate Net Zero investments and strategies.

INTOG INNOVATION NETWORK

Maximise the collective innovation impact and value to industry of the INTOG projects.

WINTOG

Through collaboration, support the delivery of current and future Offshore Wind TOG projects:

- Maximise decarbonisation of offshore O&G assets
- Maximise the impact of TOG projects for the energy transition and ramp up of Floating Offshore Wind in the UK

INTOG INNOVATION NETWORK

Maximise the collective innovation impact and value to industry of the INTOG projects.

Initial Scopes

- Route to Market
